

For the Piccolo Trumpet cornet shank

167 D	Created for Nicolas Pardo for playing his scores at the "Orchestre du Capitole de Toulouse"
--------------	---

For the Bb cornet shank Ø8.65mm

168 B2	Medium cup, really precise. Made this one for David Bonvin
---------------	--

168 A	The perfect balance between the depth, width and throat size procure a warm sound rich in harmonics
--------------	---

165 A	The Brass Band sound – a deepest cup with a smaller size, for an effortless dark sound
--------------	--

For the Cornet throat size #19

" It is very delicate to find a mouthpiece for the piccolo trumpet which offers a very great comfort and with which one can keep precision. Two very important parameters to feel safe to ensure solo or orchestral scores This model with the cornet shank allows a game in finesse but also keeps the present side that is asked the soprano cornet in the brass band. " David Mercier
